Alternative Service Planning
What would we do differently?

- During the previous Stay-at-Home, our AmeriCorps Members were able to continue service provision through virtual means and no-contact drop offs of food, hygiene products and Narcan.

- If stay-at home orders were to re-occur, our Members would engage our clients through the same methods utilized in spring 2020.

- The Members would need to follow social distancing and health guidelines, including mask wearing and increased hand hygiene throughout their period of service.
